

Adalogical Ænigmas

No. 35

Gentle solver,

Wherever I travel in the world, I make it a point to visit the largest local church or, better, *cathedral*. My quest is not for *spiritual* sustenance but rather to feed an *aesthetic* hunger. Specifically, I hope to encounter that paragon of geometrical creativity, a *stained-glass* window. Those careful arrangements of colorful polygonal panes, those translucent mosaics of orderly beauty, ah! Truly, they nourish my soul!

The present ænigma is inspired by this vivid *passion* of mine.

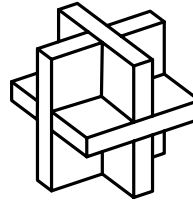

The irregular grid below represents my own stained-glass window, with the regions outlined by the grid lines being the tiny panes of glass. I pray you will *blacken* some of those regions according to the clues provided by the little dots:

More than half of the regions surrounding a *black* dot must be blackened, but around a *white* dot, more than half of them must remain *unblackened*. Surrounding a *grey* dot, *exactly* half of the regions are to be blackened.

Once you have completed your window, you may move on to finding the final answer to my ænigma. The image formed from all of your *blackened* regions will reveal a clue to your final answer, which this time is a *well-known book*. (Please note that, in the answer box below the grid, I have *elided* the spaces between words and simply broken the title into two roughly equal-length pieces.)

Good luck!

Ada
