

# Ana-Links Meta-Puzzle: Series A

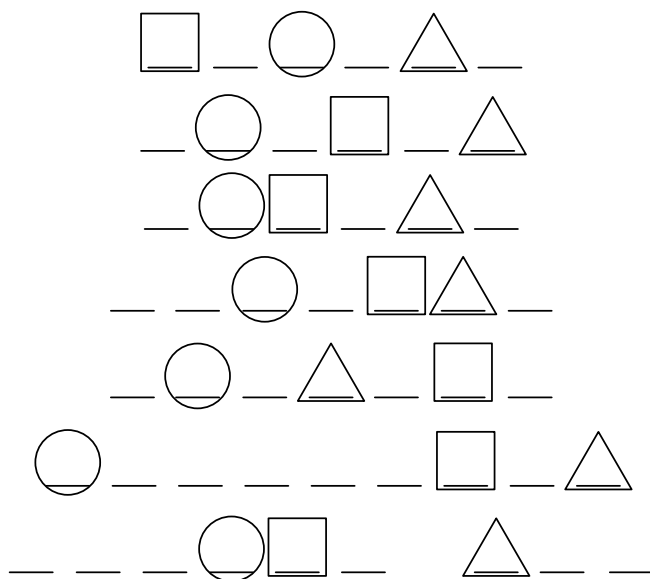

---

Ana-Links Series A consists of *seven* separate Ana-Links puzzles, each of which can be solved and enjoyed completely independently. However, if you collect and solve all of the puzzles in the series, you can combine their answers into one big, final meta-puzzle!

As you solve each puzzle in the series, enter its answer into one of the sets of blanks below. Often, you can tell *which* set of blanks by how many letters there are in the answer. But some puzzles have the *same* number of letters in their answers; for those, put them in the blanks in alphabetical order.

Once you've solved all seven puzzles and entered their answers below, you can work on solving the meta-puzzle! Gather up all of the *circled* letters below and arrange them to spell a single word; enter it on the line labeled with a circle. Do the same with the letters in *squares*, and then those in *triangles*.

Those three *new* words are the clues for one last Ana-Links puzzle! Solve it like any other Ana-Links, and the final meta-puzzle answer will fit in the bottom set of blanks on this page. Good luck!
